
THE LAND IS PAID FOR IN HOMES.

Everyone who hears this idea asks me the same thing first. Where half an acre between Juhu and Bandra West comes from.

A 1,820 sq m plot in Juhu sold for INR 455 crore in December 2024. That's about INR 2.3 lakh per square foot of land.

Business Standard, 11 December 2024.

At an FSI of 3, that's roughly INR 97,000 per square foot of saleable home, before a single brick. New Juhu launches ask INR 65,000 to 90,000.

So buying land outright on the western side rarely works today. The land has to be paid for in homes.

The plan is a society redevelopment. An older society on 1,500 to 2,500 sq m, on a 12 to 18 m road, within about a kilometre of the sea.

The society's 24 families get new homes 35% larger than their old ones, rent for the four years we build, and a corpus.

15 new homes of 1,800 to 2,400 sq ft go on sale. Three and four bedrooms, and one duplex penthouse.

On a 2,000 sq m plot that's about INR 241 crore of sales and about INR 74 crore of profit, on about INR 46 crore of partner cash before bookings start.

Base case, plus or minus 15%. A real plot replaces every number.

ONE SOCIETY. 39 HOMES. ONE ADDRESS THAT SETS THE PRICE FOR EVERY ONE AFTER IT.
