THE LONGEVITY LAYER PAYS FOR ITSELF FROM INR 75,400 A SQUARE FOOT.

KAAVISH RAMCHANDANI

Every investor I speak to asks me one thing about wellness homes. Whether buyers actually pay the premium. So here's the base case at three prices.

The longevity layer costs about 20% over a standard luxury build. On our 16-floor tower that's about INR 12.8 crore.

ItaliaOggi, May 2026. InfraLens, Mumbai luxury tier, May 2026.

INR 70,000 A SQ FT. NO PREMIUM.

Profit about INR 48.8 crore. 23% of sales. The same building without the layer makes about INR 62 crore at this price.

INR 80,000 A SQ FT. A 14% PREMIUM.

Profit about INR 73.7 crore. 31% of sales. This is the base case.

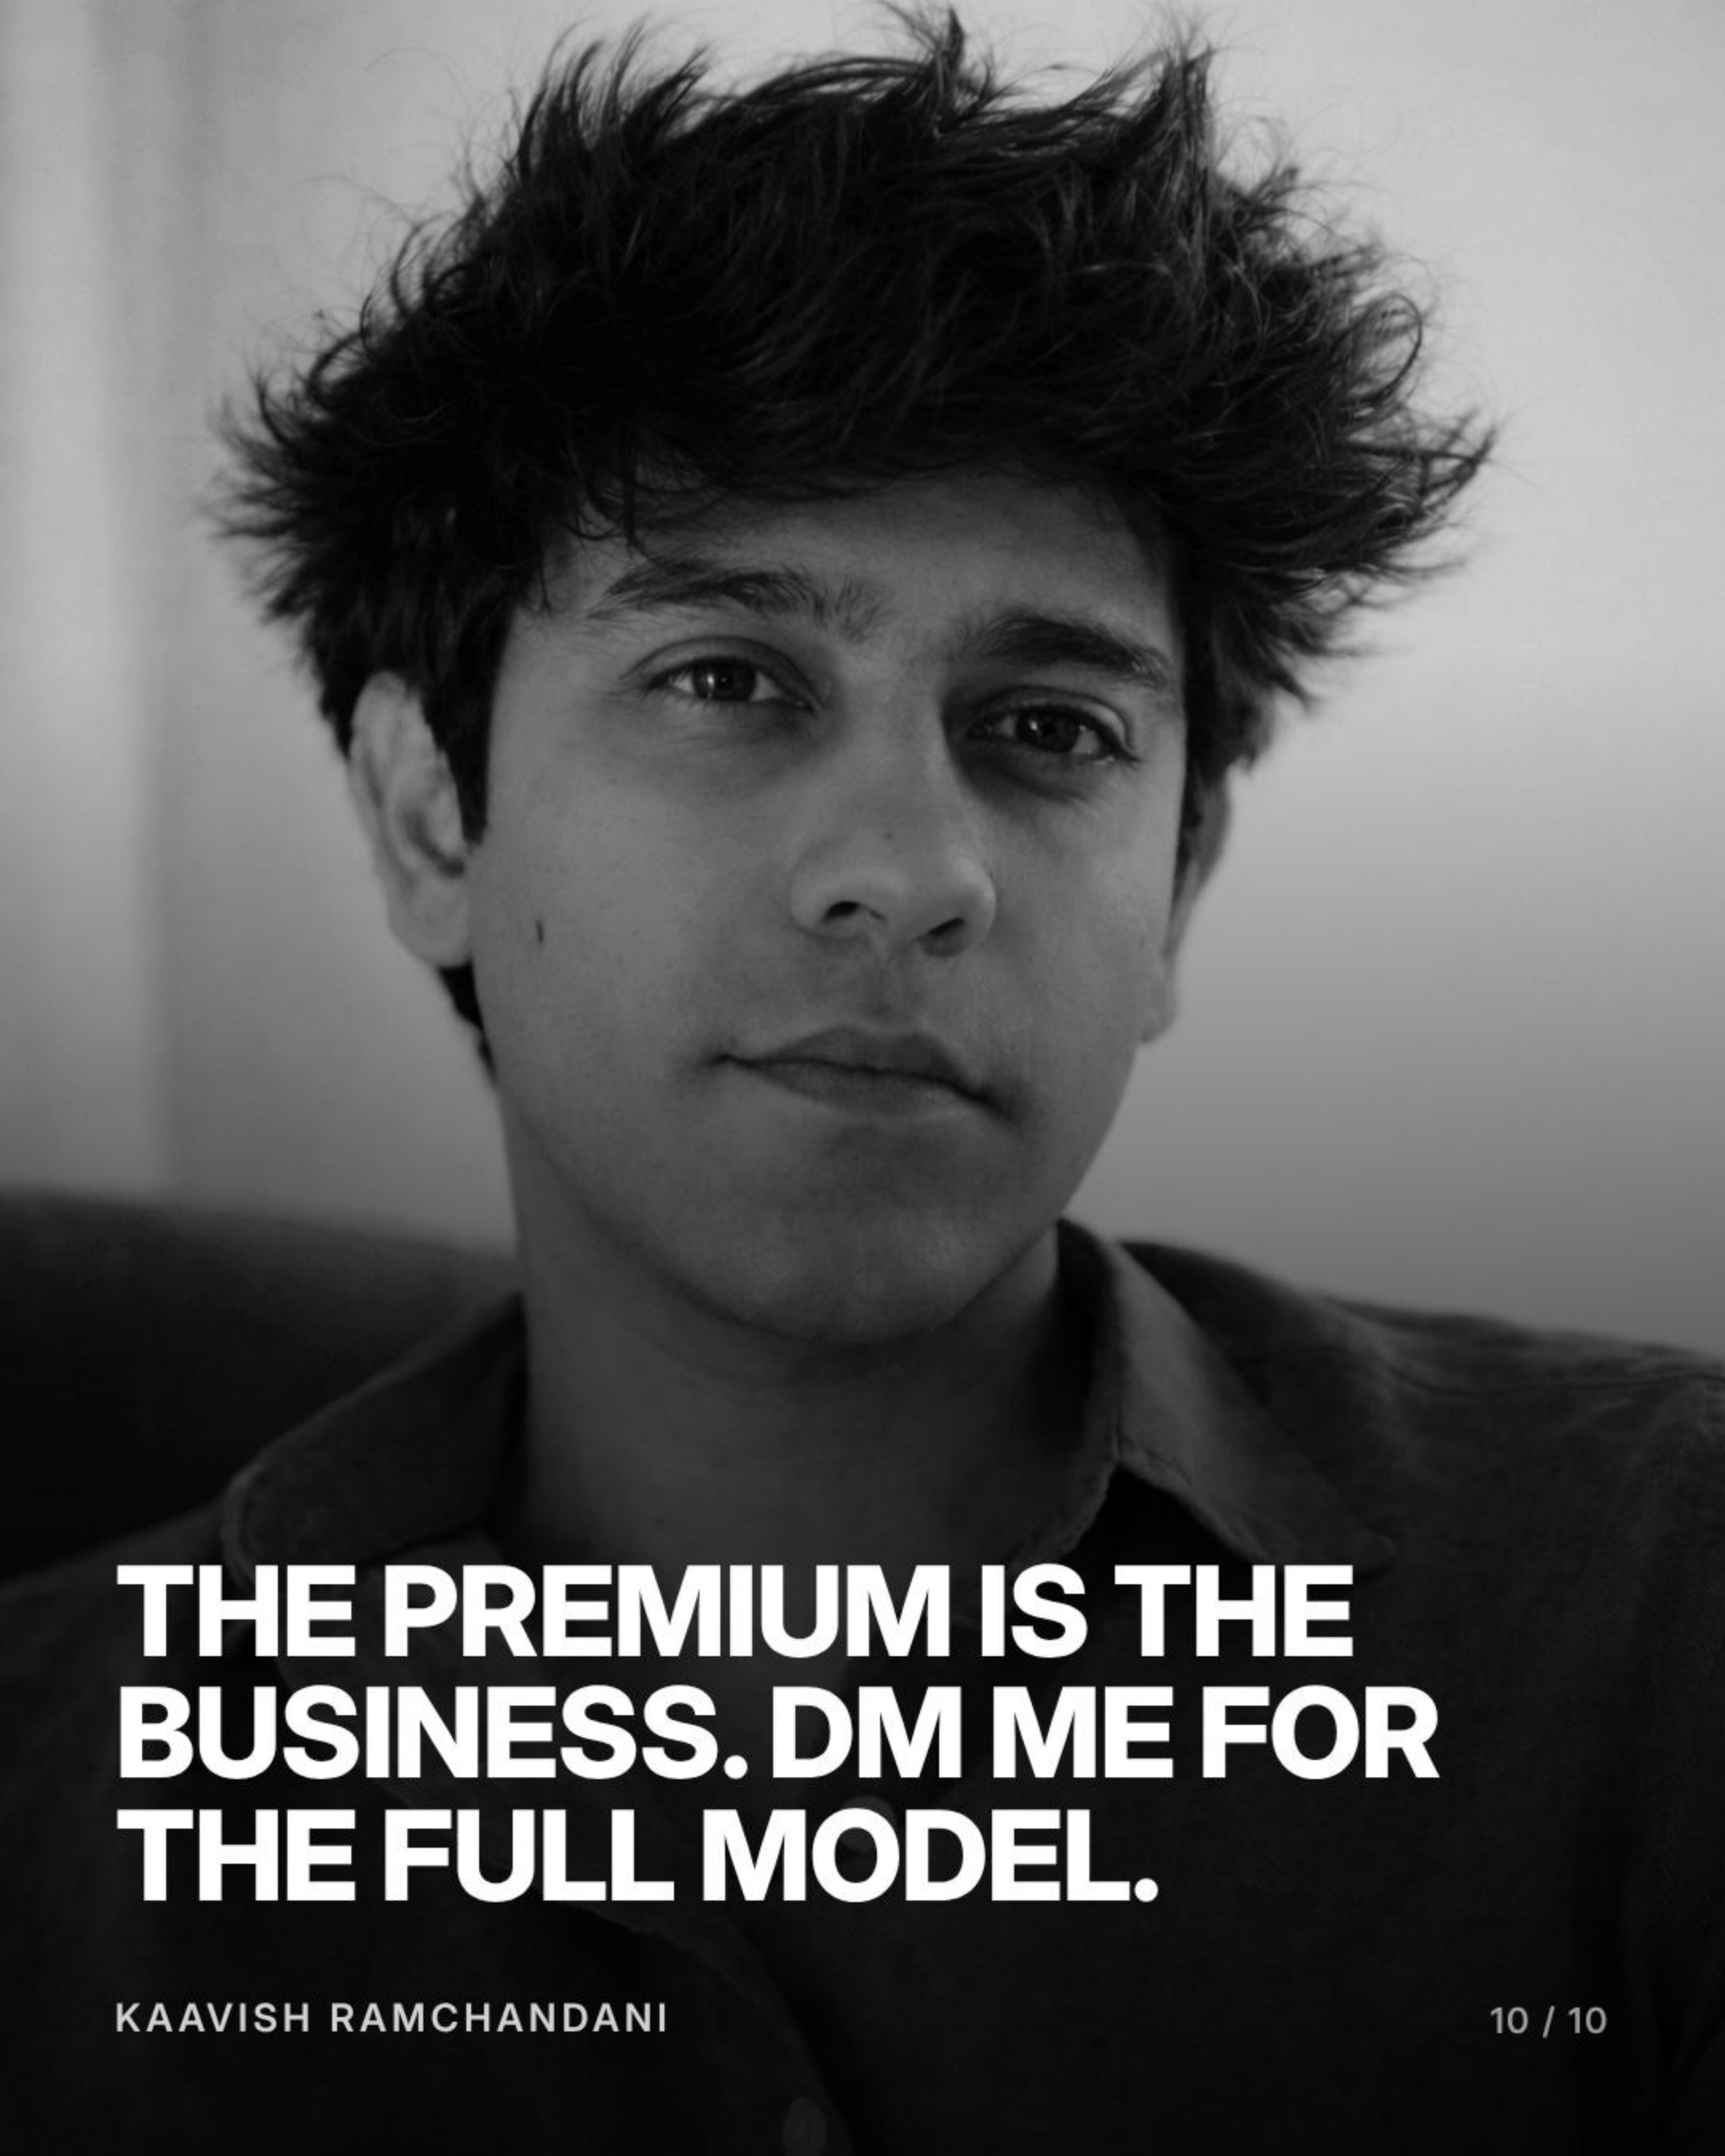

INR 90,000 A SQ FT. WHERE NEW JUHU LAUNCHES SIT.

Profit about INR 98.7 crore. 36% of sales.

The layer pays for itself from about INR 75,400 a square foot. Everything above that is the category being born.

The whole build costs about INR 166.8 crore. Partners put in about INR 46 crore before bookings start. After RERA, buyers' payments held in escrow and a construction loan fund the rest.

Base case for a 2,000 sq m plot. Approximate, plus or minus 15%. A site feasibility on a real plot replaces every number here.
