SIXTEEN FLOORS. HALF AN ACRE. ONE PLANT IN THE BASEMENT.

KAAVISH RAMCHANDANI

BASEMENT

A central fresh-air and water treatment plant. Every room in the building breathes and drinks from here.

GROUND

An arrival garden with a reflecting pool, and a double-height lobby.

FLOORS 1 TO 4

A parking podium for about 60 cars, with EV charging and full power backup.

FLOOR 5

The wellness level, about 2,600 sq ft. Cedar sauna, stone cold plunge, steam, a rain shower and a recovery lounge, open from 6 am, facing the sea. The partner clinic sits beside it.

FLOORS 6 TO 15

39 homes. 15 for sale, 24 for the society's families. Planted west-facing balconies and pale stone fins against the evening sun.

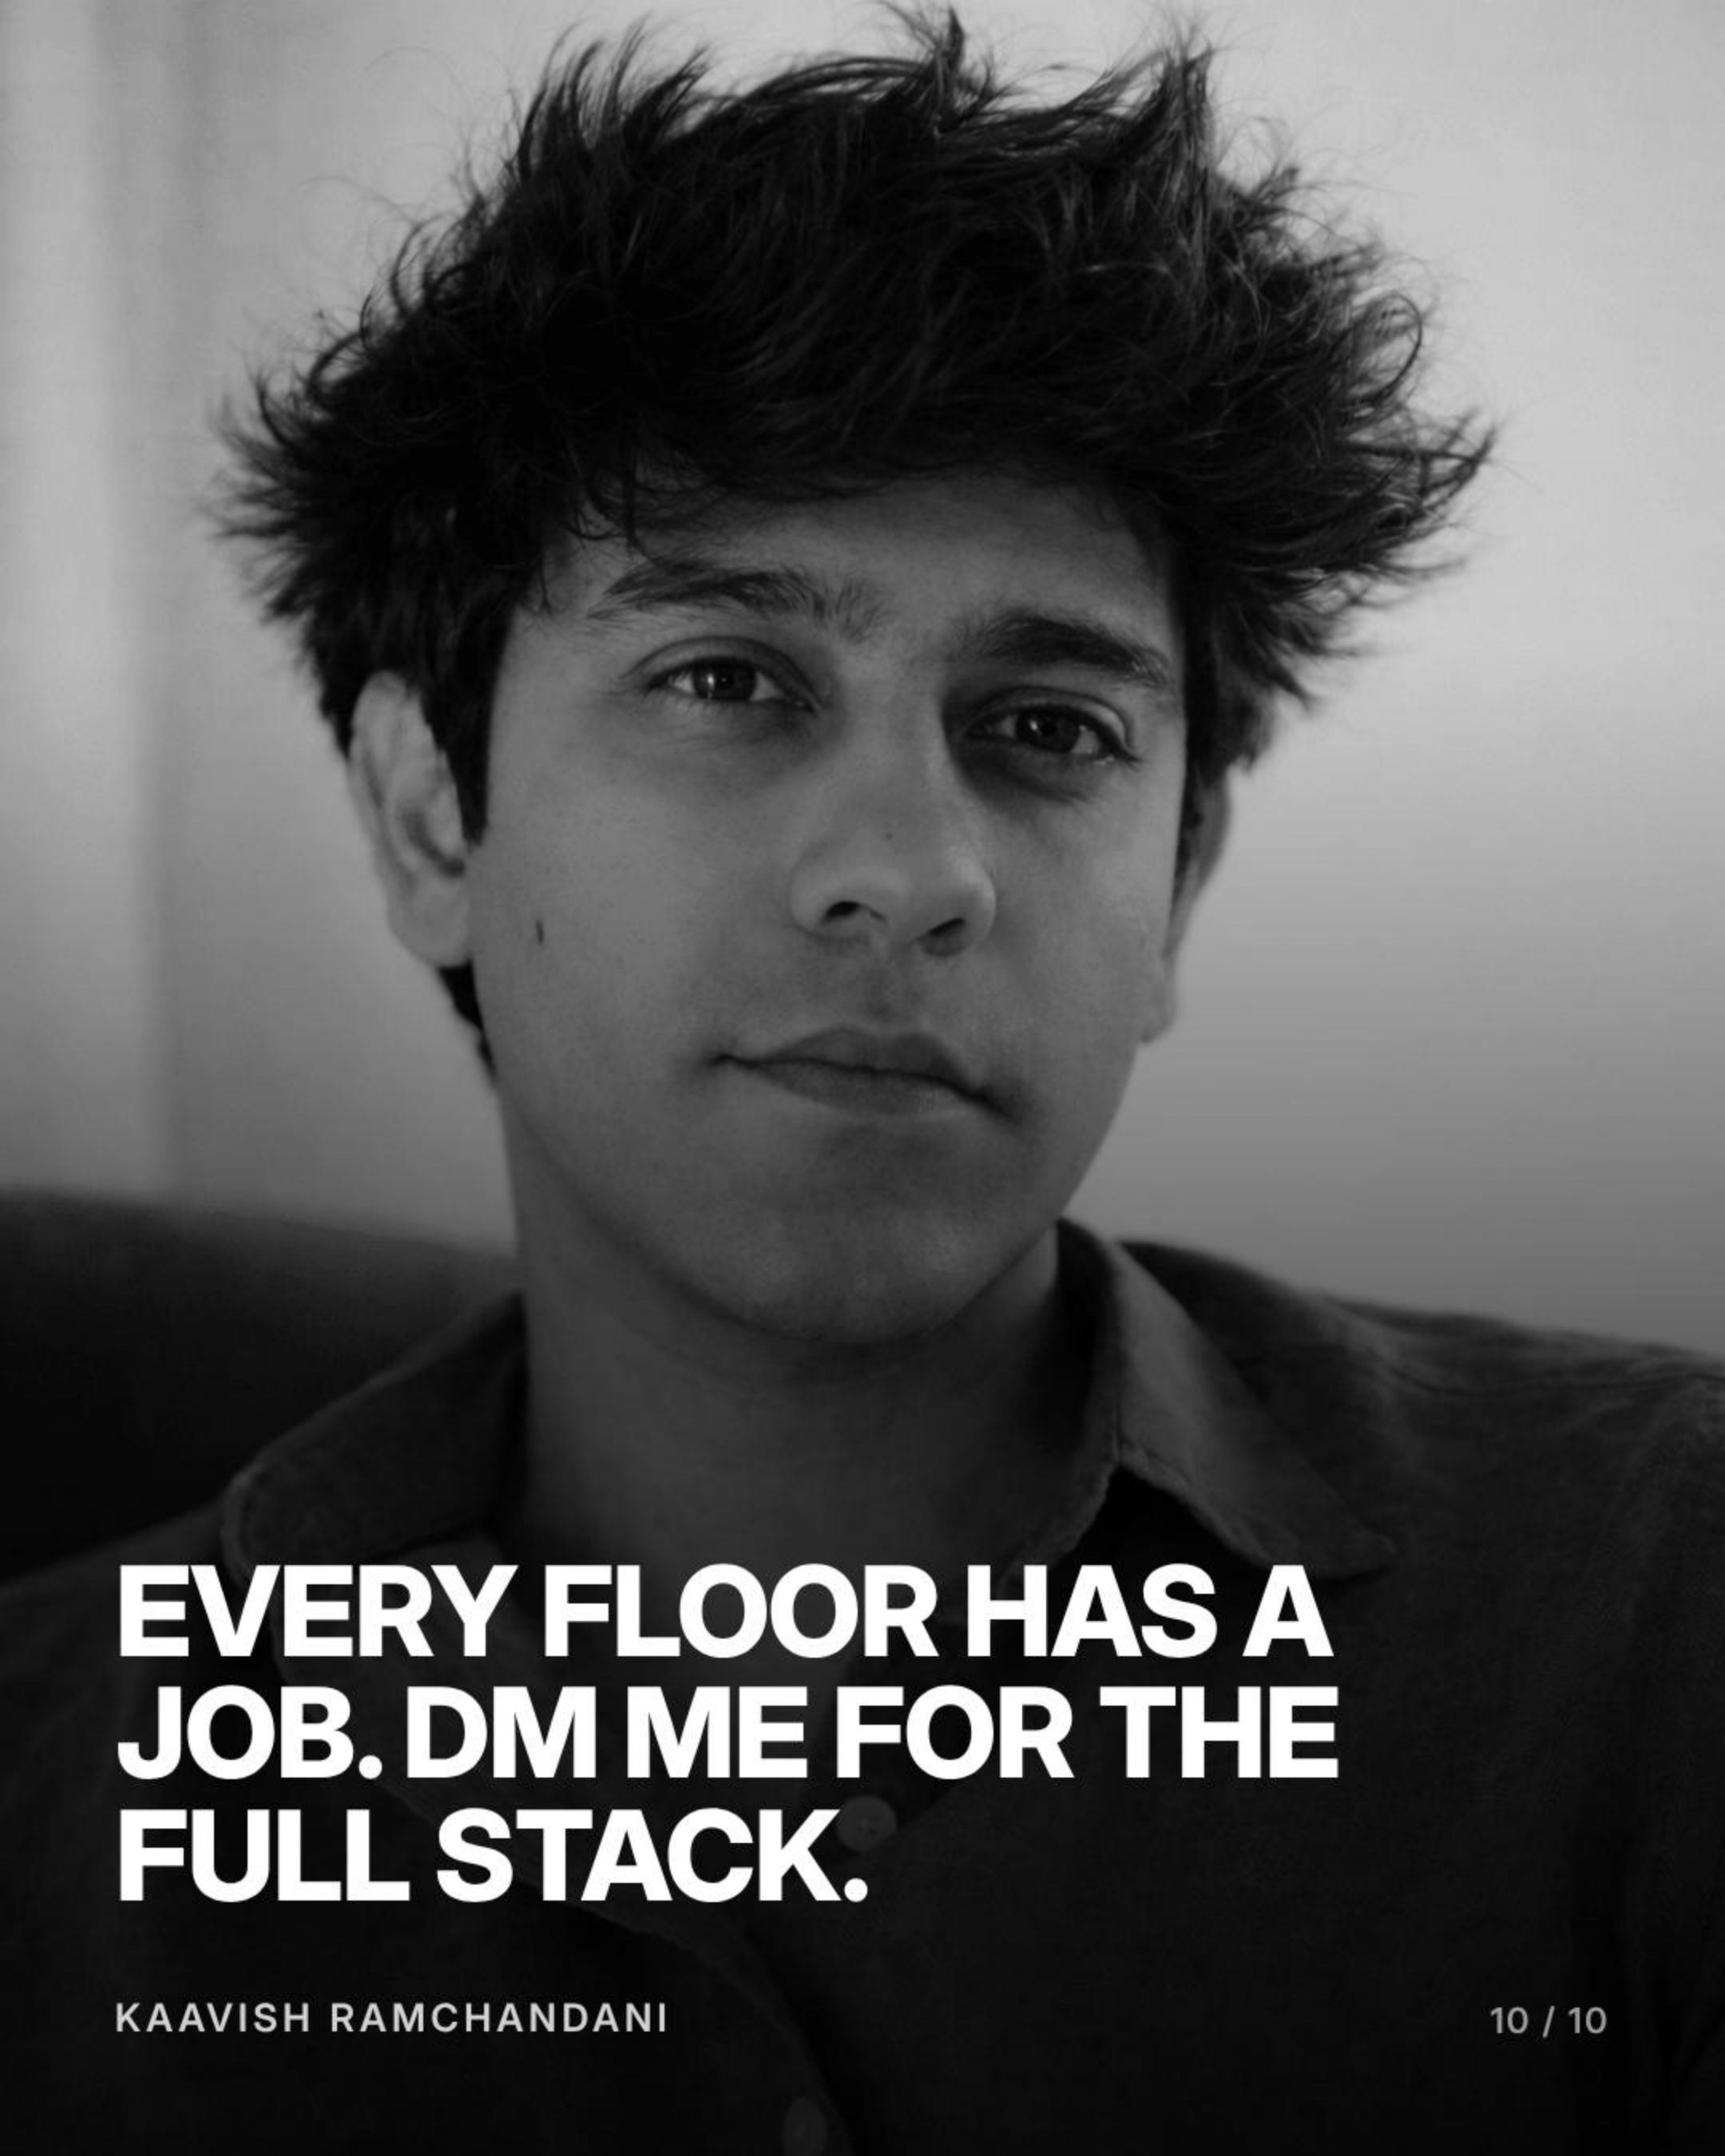

ROOF

A sky garden with a lap pool and a sunset deck over the Arabian Sea.

The wellness level is free of FSI. Since May 2026, Mumbai allows 4% of built-up area for fitness, meditation and recreation outside FSI, up from 2%.

DCPR 2034 amendment, notified 6 May 2026.

About 9,600 sq m of construction keeps the project under the 20,000 sq m line for state environmental clearance. About 16 floors keeps it inside the airport height limit.

EVERY FLOOR HAS A JOB. DM ME FOR THE FULL STACK.
